

# Elipack

## CAD SOFTWARE PACKAGE FOR PACKAGING

**Elitron**   
INNOVATIVE PRODUCTION METHODS

# Elipack

## APPLICATIONS

- Packaging
- Displays
- POP Media

## Main characteristics

- **Parametric Library.** Extensive library of FEFCO certified parametric designs for corrugated cardboard, ECMA for rigid cardboard, and designs for POP and POS displays.
- **Design with parametric functions.** Module with parametric functions for drawing, editing, re-dimensioning, and import and export of projects in the most widely used vector and graphic formats.
- **3D presentation.** Module for 3D visualization of projects for structural and graphic controls, creation of animated sequences of display/box closure and assembly. Possibility to export in 3D Adobe PDF and to import external 3D objects, for the creation of photorealistic images.
- **Soft nesting.** Module for the creation and optimization of cutting layouts.

## DESIGNED TO SIMPLIFY YOUR WORKLOAD.

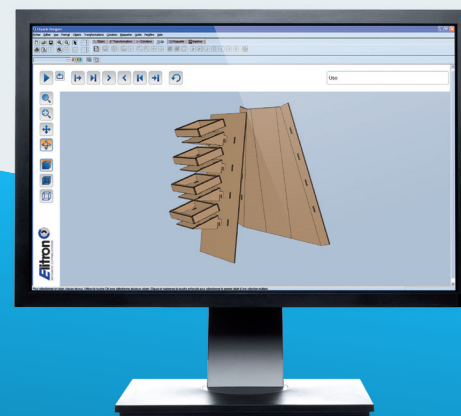

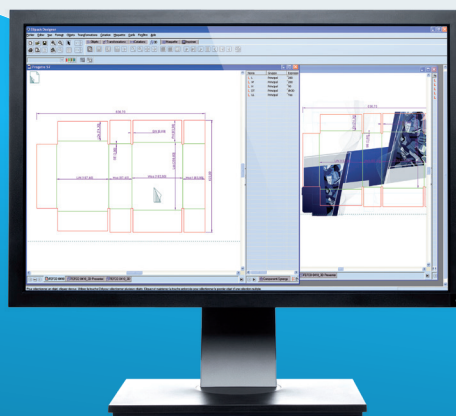

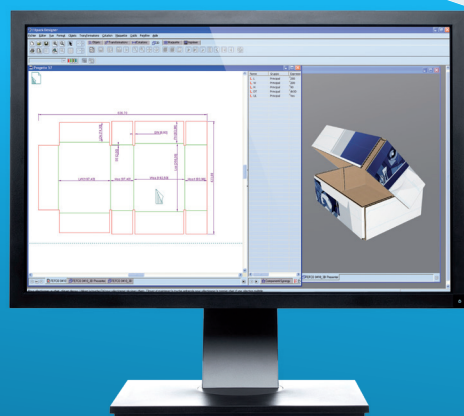

It's much easier with ELIPACK. The software package developed by Elitron specifically for CAD designs for packaging and cardboard media in Windows™. Compatible with the most popular cutting plotters on the market, and in particular with Elitron's cutting systems: **KOMBO TAV**, **KOMBO SD** & **KOMBO EL**. ELIPACK is ideal for the new needs of the packaging and large format digital printing industries. Elitron has **25 years' of experience** in research and technological innovation.

## Technical support

You can rely on technical support directly from Elitron, who offer a vast array of services for timely, high-qualified assistance.

- Introductory and advanced training courses
- Installation and system start-up
- Software updates and direct intervention via web
- Assistance via telephone, on-line and on-site
