

MediaLifter 320

The **Media Lifter** is designed to assist media moving and loading on superwide roll-to-roll printers. It has a tough steel construction and simple lifting mechanism to deliver a reliable, durable unit for easy one man lifting of heavy media rolls. The MediaLifter provides the muscle to maneuver heavy rolls without the risk of back injury thus avoiding expensive work related injury claims. Easy operation and lifting with a robust jack foot pump allows materials to be readily moved and lifted by a single operator.

KEY FEATURES

- *Lift wide range of rolls from 2 meter (100 kg) up to 5 meter (200 kg)*
- *Open frame design allows the lifter to position freely under the printer*
- *Single operator operation*
- *Expandable arms to avoid the media roll from hanging down and deform*
- *Media rolls can be moved through standard 80cm wide doorways*
- *Novel method of picking the roll with straps. Media Roll secured with straps during transportation*
- *Secure foot operated braking system*

...VERSATILE DESIGN

The MediaLifter configurations:

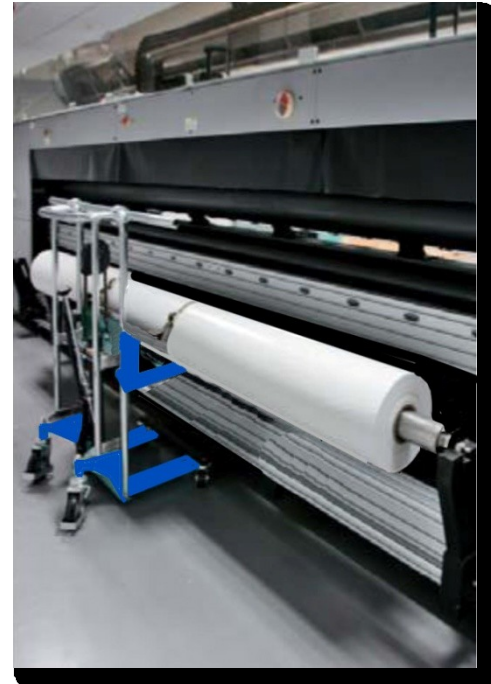

ML320 for media rolls up to 5meter wide, weight 200 Kg.

Material fixing straps to maximize media security during transportation.

Extended arms prevents the roll to curve on ends and avoid deformation

Easily lift and load media safely into the Printer.

	MediaLifter 320
Size (L x H x D)	155 x 121 x 73
Weight net	75 Kg
Maximum Lift Height	85 cm
Minimum Lift Height	8 cm
Roll Length	Up to 5m x (D) 40cm
Roll Weight	Up to 200 kg
Product Code	ML 320
